Arduino™ Add-ons: Shield

Lets examine add-on hardware called 'Shields' that extends the capabilities of the Arduino™ platform and simplifies using Arduino™ for specialised tasks (without burning anything).

46
PAGE

Sketching the code

Basic programs that are necessary to program the Arduino™ platform and the add-on hardware, Shield.

72
PAGE

Applications of Arduino™

We'll jump into a few simple do-it-yourself (DIY) projects in detail and provides some inspiration by pointing out to various projects that are available online.

80
PAGE

Advanced Hardware

Learn about about more advanced hardware already available or soon to be introduced for use by engineers and budding engineers.

91
PAGE

Primer to Electronics

You'll be exposed to a few details related to electronic hardware design and tips that need to be kept in mind for everything to work perfectly. We recommend that even the experts read this, lest you abandon ship on the last leg of your hardware design journey, due to one incorrect connection on the circuit board.
