

APPLICATIONS OF ARDUINO™

In this chapter, we'll look at components that are a part of interesting electronic projects and discuss a few project ideas

What you're seeing in the opening image is a visual representation of the real world by the sensors that help drive the Google car autonomously. The driver can enjoy the journey like his co-passengers and take over when he wants to. The sensors acquire data from the real world and pass it on to the computer that calculates the different possibilities and takes decision
