

You should definitely prefer the interactive version of the book, unless you have an excessively slow computer or internet connection.

We would never forgive ourselves if we didn't mention virtualenv, a very popular package for Python that makes developing apps much simpler. It

The Viz Mode in online Python IDE CodeSkulptor lets you visualise your Python code as it runs.

allows you to create virtual Python environments which lets you develop and test your code in a clean environment that isn't tainted by all the Python packages you have installed globally.
