

was allowed to copy versions of the OS. Computer store even allowed users to copy versions off the Macs used for demo purposes for the price of a box of floppies.

The simulation in question is available once again at jamesfriend.com.au and the nifty thing about this is that it's presented through a black and white Macintosh Plus from '86. This has been the first simulation so far that has given me proper control over the mouse and comes preloaded with games and a bunch of abandonware applications.

4. Windows 95

Something that should sit at the top of any click-hole article that validates a childhood spent in the 90s should be Windows 95. Available at virtualdesktop.org, you can find this and another entrant in the aforementioned list, Windows 95, replete with authentic Microsoft Internet Explorer and even Outlook Express. Once again, the website hosts demo versions and you're still no closer to using a real OS, but, the big reason to take a peek is the variety being offered here.

Windows 2000 Pro with Microsoft Internet Explorer 6 and Outlook Express 6

Windows XP Pro with Microsoft Internet Explorer 6 and Outlook Express 6

Windows XP Pro SP2 with Microsoft Internet Explorer 6 SP2 and Outlook Express 6 SP2

Macintosh OS 8.6 with Microsoft Internet Explorer 4.5 and Outlook Express 4.5
