

don't have the exit password the KIDO'Z app is the user interface portal through which they can experience the internet.

The master settings allow parents to determine which apps are visible on the device as well as set up usage limits for each account. This time limit feature ensures that kids don't binge on digital media and have are forced to do other things. The in-app KIDO'Z browser can also be customised to block out pages and implement parental controls when surfing the internet. The browser comes with an ad-blocker and a pre-set of approved pages which can be broadened by the adult user for the child. The program also connects to a App store which has all child friendly options that are educational and fun. Other aspects include KIDO'Z TV and KIDO'Z Games, while the Games market is mostly flash based, the TV app is perfectly tuned to kids with educational movies, video clips and shows that kids will love. The program can also be managed by desktop through the admin adult account so that changes can be made as and when required without having to take the device from the child.

Famigo Sandbox

The Famigo Sandbox app is another powerful child-centric user experience design for the Android device. Famigo touts itself as an early education program and it does show. The app is suitable for kids from the early age of 1 or 2 years old as

Famigo might just be what you're looking for

well as children with disabilities such as autism. The app comes is a variety of plans, the free plan provides users with a protected learning environment for their child with limited games, videos and website access. The app also restricts in-app purchases by the child and requires adult intervention. The other paid plans are for Rs. 60 and Rs. 300 per month - the former plan includes new videos, educational safe web browsing, security features and app integration from the main device. The latter plan adds to the basic plan with a variety of free apps and more intricate ability to employ parental controls like time limits and usage monitoring. The paid versions do make the experience better as the content in videos and games is constantly refreshed with useful media.
