

The major bonus here is that the media isn't curated by an algorithm or software, rather it is a team of humans at Famigo who hand pick the content to ensure their security and relevance.

TOP 30 APPS FOR EDUCATION, CREATIVITY AND ENTERTAINMENT

To get you started on the right foot we present you with our top suggestions for the best kids-centric apps on the market right now. And best of all - they're free.

Endless Reader

Price: Free, In-App Purchases

OS: iOS, Android

The Endless Reader is a great app to get your kids reading from an early age. The app is presented as a rich world of lively and cute monster characters that befriend you child. The app design is great in helping children learn to spell words and also act them out adding deeper retention and understanding.

Dr. Panda's Toy Car

Price: ₹ 120

OS: iOS, Android

This game is a great environment for kids to enjoy role-playing games with an educational twist. The game includes two giant cities to explore using a variety of vehicles. The interactive nature of the game engages kids to keep exploring and learning new things on the go. It even allows for basic multiplayer and is available ad-free.

Hoopa City

Price: Free, In-App Purchases

OS: iOS, Android

Think of this game as SimCity for kids that uses the interactivity and fun of open world creation and infuses it with educational lessons. As kids learn how to bring together elements to build a city they also learn about different buildings and rules. The game is open to discovery and has great replay value for young children.
