

Stack the Countries

Price: ₹ 120

OS: iOS

While the game itself is very basic, it is quite cute and densely packed with lessons. The subject matter of geography is eased into the child using cute characters in the form of country shapes. The quiz format helps gain knowledge of flags, cities, landmarks and nations.

The key lessons are to know the names of the countries and where they are located. Highly engaging and fun.

Alphabetic

Price: Free, In-App Purchases

OS: iOS, Android

This spelling game is fairly sneaky in how it used gameplay to teach kids how to spell. Its a highly engaging hidden object game where kids need to learn spelling skills to accomplish the goals. The best way

to play the game is to play the game with your child and encourage them along to discover the right letters.

Buddha for Kids

Price: ₹ 310

OS: iOS

An odd yet effective game, Buddha for Kids, is intended to teach kids history. The app maker has a series of similar apps that focus on different historical figures.

The game itself uses illustrated images to tell the story of Buddha in an abridged manner. The artwork and story telling is perfectly suited to young minds.

Lego Juniors Create and Cruise

Price: Free

OS: iOS, Android

The app from toy brick maker Lego is intended for kids between 4 and 7 years of age. The game is a great way to foster imagination and building skills without having to deal with the physical mess and cost of physical Lego
