

what the title promises. Not only is the app good to teach safety but also helps kids sing and dance.

Tynker

Price: Free

OS: iOS and Android

It's never too early to learn how to code. And with the Tynker app, parents can familiarise their kids with the basics of programming skills. Perfectly suited for the 5 and above age bracket the game helps build algorithmic thinking. As kids progress in the game they build up an understanding of how to construct coding puzzles. These skills can then be used in the Sandbox mode to make new games by the kids themselves.

Me Books

Price: Free

OS: iOS and Android

The interactivity afforded by the digital medium is brilliantly used for getting kids to read with Me Books. While interactive enhanced ebooks are available separately, the Me Books app brings the best for kids under one button. The books include popular characters such as Angry Birds as well as movies like Frozen, to keep kids interested. The app helps your kids learn to read better and can even be used to re-record a narration in the voice of your kids and yourself.

Toca Lab

Price: ₹ 190

OS: iOS

Another Toca Boca experimental game apps which brings science into the mix. For parents who wish to get their kids comfortable and interested in the subject from an early age there is no better choice. Kids can explore the periodic table and understand how different reaction work such as heating, mixing and spinning (centrifuge).

The Very Hungry Caterpillar and Friends

Price: ₹ 60
