

OS: iOS and Android

By taking one of the best children's books ever written and infusing it with the power of digital interactivity, this app is a great way to teach kids many things. Using the same beautiful illustration from the original story, the app takes young kids on a journey with the Very Hungry Caterpillar and teaches them counting, memory skills and pattern recognition, all the while reinforcing healthy eating habits. A great app for preschool kids.

The Foos

Price: Free

OS: iOS

The Foos is another great app to get kids into programming. The basic version allows kids to learn how algorithmic routines work through the game dynamics. Kids guide the game's Foo characters to complete each level by dragging and dropping instructions into their routines. The game is expected to be enhanced and broadened as the year goes on.

DisMonster

Price: ₹ 190

OS: iOS

DisMonster is a great app for young kids who might be scared of the dark and monsters. The app encourages the kids to confront their fears in a safe and fun environment. The app helps kids get over their fear of the dark and can even get them to understand how scary looking things in the dark are just harmless objects. Its a great way to build confidence for young children and learn how to take control of their imaginations.

The Sight Word Adventure

Price: ₹ 120

OS: iOS

The Sight Word Adventure is a gaming app that helps children who are just learning to speak some important vocabulary. The app uses vital high frequency words for young speakers and readers so they become more
