

comfortable with communication. The app is at its core a memorisation system which helps with difficult words that children don't naturally retain. The app used various mini-games to teach hundreds of words while allowing parents to track their child's progress. The interface is very intuitive and relatable to the early years of formal education, making kids prepared to excel in school.

Telling Time With the Smurfs

Price: ₹ 190

OS: iOS

Telling Time With the Smurfs is exactly as the name implies - a teaching tool for understanding time using cartoon characters. It comes in the form of a story adventure to get across the practical skill of time telling.

The replay value allows kids to keep practicing their skill in various forms of the exercise. The game comes with a rich production value of music, sound, illustrations and effects to keep kids interested at all times while they are being educated. The intelligent progression from stage to stage allows kids to pick up all the necessary skills in an easy and fun manner, making the app a total value for money.

Autista - Speak, Type and Play

Price: Free

OS: iOS

Autista is an app designed by an Indian app maker specially targeted towards kids with autism. The app helps these kids improve their verbal and motor skills through smartly designed games. The game comes in

three major modes: Speak, Type and Play which focuses on verbalising, typing and fine motor skills respectively. The game interface is customisable to suit the child's needs and uses a variety of tools to help connect with the child. The app was designed with input from specialist agencies and professionals in the field of autism education and has proven to be a boon.

Avaz

Price: ₹ 6,900
