

the reading of Harry Potter by younger kids even after the movies and books have run their course.

A Mighty Girl

A Mighty Girl is a highly recommended website for younger girls. The website brings together games, toys, music, videos and stories for girls of all ages that foster empowerment and inspiration. The goal of the website is to educate and condition girls to be more confident and foster higher self-esteem through positive and inspirational storytelling experiences. The website helps girls find relatable content that speaks to their issues and needs, all the while helping shape them into powerful young women.

Build

The Build With Chrome website uses 3D rendered virtual CAD (computer aided design) programming to create a Lego-like environment. Kids can login using their Google ID or just use it as is, however the former allows them to save and print their designs. The website allows kids to have true LEGO building experience with multiple coloured bricks and a variety of differently shaped parts. The potential to create is limited only by the imagination. The highly engaging program is easy to navigate and smoothly operation on Chrome. It helps children develop spatial reasoning and coordination necessary during the early years. The objects built using Build With Chrome can easily be exported, shared, saved and printed for the child to have. And if the parents are familiar with the technology they can even be sent for 3D printing if the resources are available.

How Stuff Works

Perhaps the most often asked questions by kids is “why?”. And rightly so, but it
