

can be extremely frustrating for parents to keep answering every tiny question. In this case, the website How Stuff Works is a great boon to helping answer your kid's questions. The website is easy to navigate and filled with a vast store of information to answer the most inquisitive child. The website also has videos, shows and games which help to test how much the child has learnt. For young kids the website works best alongside the supervision of the parent who can help use the visual illustrations and videos to explain things to their child. For older kids it is a fascinating place to explore and learn on their own.

NASA Kids Club

It's never too early to get your children fascinated with the cosmos. The NASA Kids Club website is a great place for budding astrophysicists and astronomers to catch the science bug. The exciting information is presented to kids across a variety of ages and can be tuned to different skill levels. The

website has a number of space related games for kids to enjoy as well as a variety of entrancing photographs. The website also has printable colouring sheets and suggestions for teachers and parents alike on how to help their kids learn more about space.

Funology

The Funology website hosts various creative activities for young kids and parents. Kids can find activities like different crafts projects, simple cooking recipes, home based science experiments, magic tricks, jokes and quizzes. The website is regularly refreshed with new content so kids can always find

something new to do. The website works best for the child with parental involvement given its activity driven nature. A lot of the activities help the child relate to the real world through physical interaction and experience. This form of experiential learning has been critically proven to be necessary for children to have a well rounded and holistic upbringing.
