

2. Turn on parental controls, also known as ‘Restrictions’ on iPhone, iPad and iPod touch, to prevent access to specific apps and features. These apps could be timelock apps that allow you to limit the amount of time your child spends daily on his device, apps that filter out adult content, restrict app purchases and even monitor call, SMS and Internet activity. Use security software with parental settings on.

Setting restrictions on your Android device

A first-of-its-kind website targeted at kids with such settings already in place is Worldoo. Its design is tailor-made keeping children's interests to learn, express and play in mind. Co-created by parents and teachers, the ad-free, no click-outs site claims to provide a holistic ecosystem for development.

The LeapPad is another child-friendly product that's aimed at children ages four to nine. Parents can download apps from Zoodles.com and check out sites such as Common Sense Media and SmartAppsforKids.com that review kid-friendly apps.

3. Set rules and conditions for use of these devices. One of these rules could be that you should be able to have complete access to the device at any point of time.
4. Different rules apply to different kids. According to the American Academy of Pediatrics and the Canadian Society of Pediatrics, infants
