

Get creative in the World of Goo

difficulties such as hills, cliffs, spikes and wind-mills. Different goo balls have different properties making each unique.

There's also a bonus meta-game called the 'World of Goo Corporation', where the challenge is to build the highest Goo Tower. The

game subtly draws parallels between the World of Goo Corporation and real-world companies that make similar products in an attempt to get kids thinking about modern world consumerism.

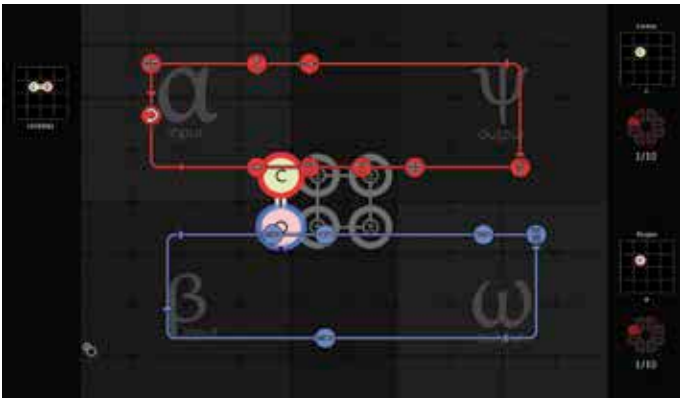

Teachers can use World of Goo as a fun way of explaining geometry. There's an open sandbox mode in which teachers can set challenges and competitions.
