

consists of a quad-core processor, both front and rear-facing cameras and a full-HD display. Amazon makes it clear that it wants children to have the full tablet experience by incorporating all the latest features into the Fire HD Kids Edition. The tablet, covered in a

Amazon Fire HD

free durable case, has a full two years no-nonsense warranty, which Amazon assures covers all damages caused to the tablet.

One useful feature found in the Fire HD Kids edition is parental control, known as 'Amazon FreeTime'. Parents can change the settings of the tablet, add time slots for use and control what apps can or can't be downloaded using a passcode. There's also the option of creating user profiles so that multiple children could have their own accounts with personal settings. Like all Amazon tablets, this one also has a customised version of Android made by Amazon. Kids can get access to free books, movies or TV shows for a full year.

2. LeapFrog LeapPad

LeapFrog is an education-centered company that combines the latest technology with educational resources. The LeapFrog LeapPad is one such example. It sports a 5-inch touch screen and Wi-Fi, along with 4GB of

LeapFrog

memory and a quad-core processor. Bundled with a durable green case, LeapFrog also provides a two-year warranty similar to Amazon's, promising to replace the tablet if any damage occurs.

The LeapPad comes with its own proprietary software and can have
