3.Kurio 10S

The 'Kurio 10S' is an Android tablet. It has a 10-inch IPS screen, a quad-core processor, dual-front stereo speakers, and front and rear cameras. It comes with a protective bumper cover and 8GB of internal memory. One advantage of the Kurio 10S is that it provides access to the Google Play store, so that users can download a wide range of applications. The tablet also has multiple parental control features and a child-safe web browser that prevents children from encountering explicit content online.

One can set up to eight user customisable profiles and restriction app download as well. The interface can also be changed to the stock Android interface and used like a fully capable Android tablet. Parents can also manage

Kurio

time by setting up time slots and block tablet access for certain time periods. The tablet comes pre-loaded with 60 apps, including popular mobile games such as Angry Birds, Fruit Ninja and Cut The Rope, as well as content from kid's movies such as Cars 2, The Avengers, etc.

4.Samsung Galaxy Tab Kids Edition

Samsung introduced its own tablet with kids in mind after seeing the market for children's devices. It's called 'Samsung Galaxy Tab Kids Edition'. It comes encased in a colored bumper for protection and has a 7-inch display, 1.2Ghz dual core processor and Android 4.1. The user interface comes in two modes: Kids mode and the default Android mode for advanced users. The Kids mode consists of a tiled arrangement, with each tile representing an app. It also comes with pre-loaded content such as games and anima-
