

Kodu

on the Microsoft UK blog, “In Australia, the Victoria Department of Education is using it in a pilot programme across 26 of its schools, and has created a site called ‘PlanetKodu’ to continue development, which is an entire Kodu community with lots of help and video screencasts.”

Kodu is a fun and educational resource and worth a try if your child is interested in making games as well as learning the basics of programming.

OTHER TECH TOYS

Our guide on tech toys isn’t nearly over. There are a few amazing creations that are a part of no precise category, but still awesome and intuitive enough to be worth a mention here.

1. Anki Drive

If you’ve always wanted to drive a car via your smartphone, ‘Anki Drive’ is the closest you’ll get to driving any car. Anki Drive is a remote-controlled car system with a difference. The user can connect with a car through a smartphone and control the car remotely. The starter kit comes with two cars, a special track-like mat which the cars race on, a micro-USB charging cable and instruction manual. There are seven different cars available, and each car has its own specialities with four different attributes – Combat,
