

providing an auditory diversion that is safe and soothing. It makes use of white noise—better known as the static sound from TVs and Radios that are not receiving a working signal—which has been shown to encourage deep sleep, enhance meditation, and even cure insomnia.

Besides the standard color-coded noises it also includes loops of ambient sounds such as a car ride, vacuum cleaner, dripping water, air conditioner, and some others. In addition to noise generation, the app also includes a virtual baby rattle that can be controlled by motion and touch.

Help your baby sleep better

HealthKartPlus (Android, iOS, Windows Phone)

Keeping your family in good health is always a primary concern. HealthKartPlus is an excellent app that gives you extensive information on medicines available in the India. Designed for the use in India and recognized by the Indian Ministry of Health and Family Welfare, this app features a very intuitive interface that makes it easy to use, even for those not familiar with smartphones.

The app has a number of extremely useful features, including a database of over 100,000 medicines. As an expecting mother, you can check the side effects of a particular drug, including its impact on pregnancy and lactation as well as its effect on your body if you consume alcohol. Parents can use the app to learn about various ailments for which medicines are available, so as to gain a better understanding of the drug's effects on their child's body.

You can also use the app to search for substitute medicines, most of which have the same composition but are significantly cheaper since they are manufactured by a lesser known company. Users in the Delhi NCR region can avail of the HealthKartPlus delivery service. You can use the app to order medicines and in some cases avail of a discount of up to 15%. You can use your phone's camera to scan your prescriptions to store in the app, which you can use later to order medicines.
