

As newer models come out it isn't inconceivable that the BeagleBoard Black will advance its specifications to match up to the Pi. But in terms of pure geek-quotient, it is necessary to say that the BeagleBoard is a better product for a variety of uses. But as long as the online community is heavily skewed in favour of Pi related DIY projects, we can safely expect to see the Raspberry Pi dominating the market.

The world renowned astrophysicist and educator Neil deGrasse Tyson has a very elegant idea about how best to foster science literacy among the population. To paraphrase, children are driven by curiosity and naturally
