Open source alternatives

You'll find a wide range of free DVD authoring programs on the web. Pick one that best suits your requirements. A huge advantage of open source programs is that you can install several programs and uninstall them once you've found the program most useful to you. Let's look at some of the best open source DVD authoring programs around.

- ◆ **DVDStyler (dvdstyler.org):** works with all operating systems and enables you to create DVDs with interactive menus and ready-to-use menu templates. You can add multiple subtitles, audio tracks, buttons, text and images, and scale graphics objects. If you're an advanced multimedia professional, you'll be able to customise navigation with the help of DVD scripting. The software program supports a wide range of file formats as well as multi-core processors.
- ◆ **DVD Flick (dvdfflick.net):** grabs numerous video files located on your
