

onds. We continued our test by adding another video file of three minutes duration and the process was completed in one minute and 30 seconds.

To work with DVD Flick, you'll provide the output folder by selecting the 'Browse' button located at the bottom of the user interface. Next, select 'Add title' and add the required video clips.

Easily create movies from video clips with DVD Flick

Finally, select 'Create DVD' and then you'll be able to view its progress. The whole process takes more time than with Sothink Movie DVD Maker. The output folder won't be opened automatically like with Sothink, however the program generates a huge number of log files, which we hope will be useful to advanced users. You can set the aspect ratio of the clips by double-clicking the required video. However, you won't be able to preview the video.

After spending time with the previously mentioned tools, we began to create a movie with 'Windows DVD Maker'. You'll be able to preview the video before burning it to a DVD. You can have a firsthand look of how the menu appears on the screen. Our impression is that Windows DVD Maker is a cost-effective program, but note that it doesn't save the created movie files to a folder on your computer. You need to insert a DVD each time. However, the preview option ensures less scope for any errors.
