

its biggest new features is its 64-bit architecture. This allows the software to access all of the computer's RAM, which helps boost performance, especially when it comes to heavy documents with high-res images. It also includes larger page sizes and verified PDF/X-4 Output, which helps with faster output, smaller size files and higher quality print output. QuarkXPress' designer-controlled automation features for documents give them automatic footnotes and endnotes. Its alternative Table tool has better table style integration with Excel. It also automatically populates recurring fields. QuarkXPress gives you the ability to create HTML5 fixed layout ebooks, which display pixel-perfect layout. These ebooks can also contain interactive elements.

LucidPress

Platform: Web-based

Price: ₹1,015/month (USD15.95/month)

LucidPress is a web-based DTP software launched by Lucid Software Corp in October 2013. It can be used to design flyers, pamphlets, posters, digital magazines and much more. LucidPress comes with an array of benefits – the most obvious being that you don't need to install anything on your system and you always have the most up-to-date software. LucidPress also integrates some commonly used web-based tools, such as Google Drive, allowing you to transfer text from a Google doc, embed a YouTube video or insert pictures from other sources such as Facebook, Dropbox, Google Search and Flickr. However, its best feature is real-time project collaboration. You can also set specific permission levels. Apart from this, LucidPress gives you analytics for the projects that you have published.

PagePlus

Platform: Windows

Price: PagePlus X8 – ₹7,593

PagePlus is a DTP software designed by Serif and it was launched in the year 1991 as the first commercial DTP software for Windows that cost less
