

THE RIGHT HARDWARE FOR YOUR SOFTWARE SUITE

If you've checked out the various open source software suites shown and are happy with them, you may want to consider buying parts and assembling a new rig tailored for the software being installed and the kind of work you do. Based on the type of work you do, here's a listing of three different computer rigs we think would be applicable for different price segments. But before you begin, you may want to keep a few things in mind.
