Corsair CC-9011011-WW Carbide Series 400R Steel Mid-Tower Case WITH 2 cooling fans	6011
TOTAL :	₹1,59,284

Here are the pros and cons of this system.

PROS :

- ◆ This setup is the perfect mid-range setup. It can handle some heavy-duty graphic work without being too expensive.
- ◆ This setup is perfect for viewing media for personal amusement as well.

CONS :

- ◆ Acquiring high quality parts for video editing may be a bit of a hassle as the bigger monitors may not be readily available and there would be delays in ordering components online.

Cost : This system is extremely expensive owing to the processor and high quality monitor being involved.

CONCLUSION

This chapter has information that is by no means new. But our aim was to bring it to the attention of those who might not be aware already. We hope it helps you in building the rig of your choice! 📺
