

- `</section>`
- `{% endblock %}`

This is our base template for the gallery's three layouts. Notice how we have added another block within our content block in this template. When we override this template for the three layouts we will only need to fill the contents in this block.

The code we have placed in this block above is for one of the layouts (the linked layout) so that in that particular template we don't need to do anything other than to extend from this one.

The horizontal layout of our gallery page

### cms/gallery\_detail\_horizontal.html

- ```
{% extends 'cms/gallery_detail_base.html' %}
{% block gallery %}
    <ul class="no-bullet">
        {% for image in gallery.images.all %}
            <li>
                <figure class="row">
                    
                    <figcaption class="small-6 columns">
                        {{ image.alt_text }}
                    </figcaption>
                </figure>
            </li>
        {% endfor %}
    </ul>
{% endblock %}
```

### cms/gallery\_detail\_vertical.html

- ```
{% extends 'cms/gallery_detail_base.html' %}
{% block gallery %}
    <ul class="no-bullet">
        {% for image in gallery.images.all %}
            <li>
```
