

DESIGN PRINCIPLES

It's not *what* you say, it's *HOW* you say it! Although, first you do have to decide what you want to say

Various schools of thought use UX Design as a means to achieve different ends. Until now you've been informed of the metaphorical tools. However, to build something using those tools, you need to have an idea of what it is that you're building and some guidelines on *how* to go about building it. To point you in the right direction, here are some of the majorly accepted principles of UX Design.
