

Thank you Steven Spielberg for your futuristic vision

Report. It uses simple hand gestures to emulate pointer movement and has buttons on the index and middle finger attachments for clicking; ideal for those who suffer from carpal tunnel syndrome.

Augmented Reality Interface

In augmented reality (AR), digital objects are incorporated into the user's surroundings allowing them to interact with them in a contextual manner. For example, bouncing a virtual ball off of a real-life wall, or using a virtual gun (or a game controller) to shoot virtual enemies in a sort of interactive digital playground.

There are a lot of real world examples of AR in action. It is a popular tool for marketing and advertising campaigns, in particular, by using your smartphone camera to scan your surroundings. A lot of apparel retailers
