

5 popular fitness app: (up left to bottom right) Sports Tracker, Adidas Micoach, Runkeeper, Endomondo Sports Tracker

who helps you a personalized fitness plan along with daily guidance and motivation. You can opt for a 3, 6, or 12-month subscription plans, all of which come with a free GOQii Activity Tracker. Hopefully, services like this may help acclimatize Indian consumers to the concept of wearbles.

The Potential of Wearables in the Enterprise Space

Wearables are an emerging technology and seem to have wasted little time in flooding the already packed consumer tech market. Initially seen as a niche market that was dominated by startups such as Fitbit and Pebble, a number of major companies, such as Google, Samsung, Sony, and Microsoft have also joined in the fray, churning out devices on 6-month to yearly cycle. However, their high price tag seems to be the biggest deterrent to their market success, besides the fact that most users are hesitant in splugging a considerable amount of money on a product, most of whose functions can be carried out by a normal smartphone or tablet. Another factor is that there seems to be very little immediate gain to buying a smartwatch or smartband that costs anywhere between ₹5,000 to ₹20,000. If it is a question of fitness, the average Indian
