

Finally, we have the Fitbit Surge, the company's most expensive and feature-packed wearable. Marketed as a 'sleek fitness super watch', the Surge features a larger OLED display and includes all features available in the lower Fitbit variants. It sets itself apart by including GPS tracking and phone notification management. For example, you can see call notifications and control music on you phone using the display. GPS helps you record run routes and elevation instead of just calculating the total distance. It has a battery life of 7 days.

If you are not a fan of the band form factor, you may be interested in the clip-on Fitbit Zip and Fitbit One. The Zip has step, calorie and distance
