

experience with extremely intuitive maneuverability. HTC also claims that the Vive will eliminate the problem of motion sickness, which a lot of VR headset testers have complained about. In addition, their association with Valve means that the device will be powered by SteamVR, and considering the 125 million strong user base of Steam, ensures that the Vive will at the very least enjoy incredible coverage on the day of release.

Galaxy Gear VR (200)

The Gear VR is currently the only commercially available VR headset on the market. However, unlike other VR headsets the Gear VR does not have a in-built display and requires a Galaxy Note 4 or Galaxy S6 smartphone for output. As a result, the Gear VR has a maximum resolution of 2560 x 1440p, currently the highest resolution available on any VR headset.

The Gear VR is easy to setup and features an extremely comfortable design, making it easy to wear even for prolonged periods of use. The

Snapping your smartphone to the front of the Gear VR is easy
