

ence's brain in the very short time that they see it. On the flipside though, you should be careful that the message isn't simplistic. For as the world gets more technologically advanced, people get more sophisticated- and a sophisticated audience would appreciate a simple message but not a simplistic one.

Where it worked:

As far as simplicity of messages go, it can't get any better than Old Spice's line, "Smell like a man, man!" The brand believed in the core message's simplicity so much that even when they introduced the 'New Old Spice Guy', the brand retained the line. (The original Old Spice Guy was introduced years back as the man every man wants to be like and also the man every woman wants their man to be)

Keep it simple silly. In other words, KISS!

4. Establish trust and credibility

Brands don't exist for a day or two. Brands are meant to endure. And an enduring brand is built by engaging an audience for the long term- in other words, by building a strong relationship. Surprisingly or not, the dynamics of a customer-brand relationship is pretty much similar to those of a human's relationship with another of his or her species. And of course, the very first thing- the foundation, so to speak of any relationship is trust. And while engaging an audience on social media, it's important to establish and maintain the trust factor. Related to this aspect is the element of cred-
