

Where it worked:

CapitalOne has a pretty savvy social media presence for a bank. And by incorporating the idea of “Job Friday” they naturally create a sense of urgency among job seekers who would come across the post.

7. Include visual and video content

It’s kinda sad, but it’s true—people generally don’t prefer reading anymore. And the fact that multimedia tools are more accessible than ever before by which you can create compelling visual content—including

Well thought out content strategy is a key for outstanding campaigns like this one

videos means more and more information is being put out in the visual format for the audience’s consumption than ever before. And unsurprisingly, the audience is loving this. What this means is that adding video and visual to the social content you create will definitely be a good idea. Also, it’s well-documented that visual content goes viral more than textual content.

Where it worked:

Well, almost all the campaigns that you see on social media these days are largely visual in character. But one piece of content that did it more beautifully (and effectively) than most came from the World Wildlife Fund. The #lastselfie campaign featured wallpaper quality images of animals with poignant messages like “Don’t let this be my last selfie.”
