

Servings like this chocolate hazelnut drink are common sights under #foodporn

end of the food porn (more on the relevant hashtags later) spectrum. The other end is occupied by the slim, svelte wildberry smoothies made with skimmed milk or low-fat yogurt, complete with chia seeds and placed alongside a bowl of oatmeal. Ensure soft lighting, balanced colours and an uncluttered setup, and you can be sure your plates are being ogled by plenty of drooling Instagrammers.

### **Odd, specific, or oddly specific**

Often, talented and passionate photographers will choose to maintain accounts showcasing something really specific - often with breathtaking results - like spiral staircases (@WorldNeedsMoreSpiralStaircases - we're not kidding, that's an actual Instagram handle) or symmetrical urban settings (@symmetrykillers). Needless to say, high-quality photography is a prerequisite, but for the most part, the novel and quirky nature of these accounts is often sufficient to make them fairly popular.

Which brings us to the next best way to post about niche topics - hashtags. Adding a hashtag in the caption or the comments under a picture is a way of categorising it. People can search for a hashtag, and the search results will then show all pictures under that category. For example, if you're in love with surf and sand, searching for #beachlife will fulfil your seaside fantasies for days. Similarly, #dailyfluff contains pictures of cute animals,
