

The world needs more spiral staircases, declares one Instagram account proudly.
We cannot help but agree.

while #foodporn has cheesy pizzas, delicate pastries and gigantic burgers. Posting relevant content is important in reaching the right audience. Finding the right hashtag to piggyback on will boost the visibility of your posts by putting them in the feeds of like-minded people. Many companies even create their own hashtags so that users can submit their content, usually as part of a user engagement drive or a promotional contest, where the best entries are usually chosen by the company and rewarded.

Let's talk tactics

You're a social media manager for an up-and-coming brand and you want to enhance the visibility and engagement of your brand among your target audience. Here are some of the simple tools for better engagement that you cannot afford to get wrong on Instagram.

1. **Hashtags:** Tagging your images under the right category will most certainly drive traffic to your page as you reach out directly to people interested in the category. Play around with hashtags of your own and encourage your followers to post with them. Don't overdo it though, as constantly posting hashtag-heavy content may be a downer.
2. **Influencer marketing:** This is especially powerful on a platform so intensely visual as Instagram. If you're a bakery, getting a celebrity chef
