

Tumblr analytics throws a lot of insight into how well your profile's performing

board so you can measure the impact of your campaigns, you can understand where your money is going and what kind of return on investment you get. The data provided will help you understand the money value of paid and earned engagement, track the effective CPE of each campaign and even see the individual performance of each post.

Again, as earlier mentioned, Tumblr might not be the right platform for someone looking to engage with more mature audiences on topics that doesn't involve the modern day meme culture. If you are a business-to-customer service looking to work and market to an older demographic, while offering services that don't require a witty and eye-catching campaign, a more sober alternative would be Google+.

GOOGLE+

Even though Google+ has not been viewed with same level of seriousness as Facebook, its main competitor, it has still proven to be an indispensable tool for anyone looking to integrate the power of their social marketing campaign with other services offered by Google, such as YouTube and Maps. Many of the strategies employed on Facebook work on Google+, but
