3. Tweetbot

Tweetbot, as the name more than implies is one app that's meant for managing your Twitter accounts. Organizing and interacting with your Twitter stream, using Tweetbot, can be done in the most productive manner. You have the options to divide the stream into lists or channels, and then tweet out when you want, respond to a tweet or you can directly make a reply from within the app.

The screenshot shows the Tweetbot app interface. On the left, there's a tweet from 'Shots from the studio' with a yellow sports car. On the right, there's a list of features under the heading 'New in Version 4'.
