

Pro(s):	
Con(s):	

Good measuring metrics

The interactivity could be better

How Sociable
Measure the magnitude of your brand

What makes IceRocket stand out is not that it's a monitoring tool but that it's one which helps you monitor Twitter, Facebook and blogs in as much as 20 languages. Also, you can access result graphs and also choose the time period which you want to monitor. With about 200 million blogs in their database IceRocket is a great tool if you wanna keep track of blogger activities. Also, you can discover the latest trending terms related to your search using this tool.

Facilitates monitoring of blogs in multiple languages

Limited number of social platforms supported
