

# WHAT'S SOCIAL MEDIA MANAGEMENT?

There can be no management without marketing, as far as social media goes

For effectively implementing social media management techniques, it's important to understand how social media marketing works. It goes without saying that social media marketing is a form of online or internet marketing that uses social networking websites as a marketing tool to drive users towards a brand or its offerings. The objective of Social Media Marketing is to generate content that users will want to share across online platforms to their individual networks. This helps companies broaden customer reach and increase brand exposure. Gaining substantial website traffic and attention is possible through social media sites. When users share content with one another they see the source as a familiar and trustworthy third party. This sort of word of mouth marketing resonates more with users even more than traditional brand or company marketing. Additionally it is also a relatively inexpensive means of marketing. Billboards and costly print advertisements are not required with this sort of marketing.

Social Media can seem like a challenging task and if not done right can be a massive waste of time. But there have been hugely successive cam-
