

KYNavigationProgress

KYNavigationProgress displays progress bar on the UINavigationController by making use of UINavigationController. You will be able to display progress bars in different colors. The following code is a sample way to integrate the functionality of the extension:

```
• import KYNavigationProgress
• self.navigationController?.progress = 0.9
• self.navigationController?.setProgress(0.1, animated: true)
• self.navigationController?.finishProgress()
• self.navigationController?.cancelProgress()
```
