

Fluent

Fluent enable you to integrate animations in Swift apps. To install the tool, you need to add the following command to your podfile and run pod install

- `pod 'Fluent', '~> 0.1'`

The Swift Playgrounds app is developed in such a way that no prior programming and coding knowledge is required. The app, expected to be available in the App Store the coming fall, will help students to learn the language quickly by presenting the difficult content in a simple way. Moreover, you can also contribute resources to the app.
