

“Source Control” from the top menu again, and click “Push”. It’ll ask you for your credentials, and it will work differently, depending on if you have enabled two factor authentication on GitHub.

If two factor authorisation is not enabled, you just have to enter your username and password, and you're done. If two factor authorisation is enabled, you need to create a new OAuth token, to allow a new service to talk to GitHub.

To create one, go back to GitHub, click on the “Settings” menu, and select applications. You will need to generate a new access token.
