

CHAPTER #08

PUBLISHING YOUR APP

Now that you've built your first iOS app, you must be aching to get it published onto the App Store, right? Hold on, it just isn't that easy.

For starters, you'll need US\$99, a credit card, and a browser. Since we're dealing with the Apple app store here, you'll need a Mac with the OS X running on it. You will also need Xcode, which is Apple's development software. You'll be able to download this once you are registered as an Apple iOS developer.
