

for landscape, 480×300 (no status bar); 480×320; 960×600 (retina, no status bar); or 960×640 (retina).

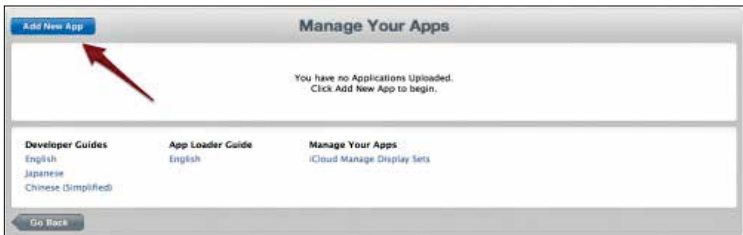

Once you've got all of this, "Manage Your Applications" in iTunes Connect. Once there click on "Add New App".

Choose the primary language of your app and enter the company name.

Be wary here though, as once you enter a company name here, it'll be difficult to change. Once you're ready click on "Continue".

Next you fill in the name of your app, an SKU number which could be any number with two or more digits, and then your bundle ID. The bundle IDs are pulled from the app IDs you have registered on the provisioning portal so make sure you pick the right one.

Once you're done, "Continue".

Next you will need to choose the availability date for your app. You have three choices here.

If you want the app to be available as soon as it's approved then you can just leave the date as the date of submission. If you want it to be available at a certain time in the future then you can enter the date you wish your app
