Review Notes (optional)

You're almost done, click on "View Details" below the app's icon and then on the following screen click on "Ready to Upload Binary".

Once there you'll be asked if your app uses or incorporates cryptography. If you're using the default cryptographic libraries which Apple's API supplies, it should be ok for you to select "No" here.

Your app is now ready to upload, just head on over to Xcode to finalise.

Rating

For each content description, choose the level of frequency that best describes your app.

App Rating Details

Apps must not contain any obscene, pornographic, offensive or defamatory content or materials of any kind (text, graphics, images, photographs, etc.), or other content or materials that in Apple's reasonable judgment may be found objectionable.
