

Also, you might be aware of iPhone's return policy. They exchange your phone in a time period of one year for all kinds of physical or software damage except water damage and give you a brand new iPhone in exchange for your old one. Be sure to erase all your data before doing this. Also if you are getting your iPhone repaired, you should make sure that it has no important data in it that might compromise your security and private information.

6. JailBreak

you must be aware of the fact that you can have a hacked version of iOS on your iPhone. This process is called Jailbreaking the iPhone and compromises your iPhone security and warranty by doing it. Avoid Jailbreaking at all costs. Unless you own an old model and want to use it for experimental purposes. Jailbreaking your new iPhone is not recommended at all. The reason is quite simple. After doing this, Apple no longer takes guarantee of the firmware of your phone and anyone could easily bypass the broken firmware. If you bought an iPhone, you must stick to exclusivity. (Or you know, buy an Android).

7. Safari Browser

iPhone has the Safari browser and it is pretty good. You can change its settings so that it gives special attention to your privacy and security. Go to Settings>Safari options>disable cookies on untrusted sites. You can also disable password remembering which is a recommended practice. Also, there are a bunch of other options you can toggle.

- The Autofill Setting should be disabled
- Enable fraud warning
- Block pop-ups

If you set all the above settings, you can be certain that your Safari browser is a safe workplace.

8. iPhone Network Settings

iPhone like any standard phone has a Bluetooth and Wi-Fi system. You should try to keep these services disabled when they are not in use. This keeps intrusive attacks from taking place in case you land up in an unsafe network. You should password protect the internet network that you are on to make sure it stays exclusive, and refrain from using Wifi that is free for anyone to use and not password protected.
