

the peer to peer network. Unfortunately, what most people don't realize is that the drawback of this whole free file sharing system is that it compromises your identity online. Moreover, since it is illegal, the software will obviously not be verified and therefore it is a prime candidate for piggy-backing malware or other malicious code. Other than the warez software itself, malicious code is often also added to the content files themselves, which unsuspecting users are in such a hurry to download. If you are a hardcore (or part-time) pirate who does not believe in contributing to the mega-corps, a safer (but still 'illegal') alternative is to use a bit torrent client over a VPN to ensure anonymity and encryption.

Setting up ClamXav for Mac

Installing 'trusted' and 'reputed' Antivirus software

Antivirus software is the single most effective solution against viruses, other than common sense safe browsing practices. It is important to note that life often offers u-turn plot twists for the unsuspecting wayfarer, such as the 'trusted' and 'reputed' anti-

virus software itself being the malware or adware. The problem is that even genuine antivirus softwares can only promote themselves and convey their capabilities so much via web content and marketing, and someone who isn't in touch in the industry may not be able to discern the difference. Genuine players carve out their reputation over time so any good antivirus software will most likely be from a company which has been around for long and knows the field. Unfortunately, many unsuspecting users have fallen prey to software like MacKeeper, MacSweeper, MACDefender, and others. The common tactic is to scare users with annoying and unnecessarily exaggerated popups and 'security warnings' that are designed to make well-meaning but non-tech-savvy people download their software.

While there are almost no strict viruses that can wreck havoc in the Mac ecosystem (as of now) it is still a good idea to have an antivirus software like ClamXav to look over your files, especially those that are frequently
