

away. But the service lacks a 'View only' feature and the ability to allow multiple users to edit the files simultaneously. Also instead of creating shared folders similar to what other services do, pCloud sends upload links to all users. There is also a nifty Facebook and Instagram data backup feature if you're into it. The business plan offers storage space to every member of the team along with a coming soon feature which'll enable custom branding.

Pricing:

- Free - 20 GB
- Premium - US \$3.99/Month - 500GB
- Premium Plus - US \$7.99/Month - 2TB
- Business - From US \$50/Month - From 5TB (multiple users)

Sync.com is an excellent choice in almost everything. Incredible security, easy to use, superior control of file sharing permissions and great transfer speeds. The service works in a common manner. Create an account, download the client, drop files into the unique folder and the service does the rest. The ability to set expiry dates for folders, put download limits, wipe accounts
