

home, we can reduce human intervention in using various devices. As an example, let's say you wish to watch a movie on your TV. You can just press a button, that will start your TV, start the DVD drive and get you straight to the movie menu or even start the movie for you. These are some of the things possible by automating our home. The sequence of events presented here come under the category of complex logic, and therefore, can be difficult to implement.

Home Automation isn't cheap

Affordability:

Affordability is a relative term. Not everyone in India can afford a smartphone today but India is still the third largest smartphone market in the world as of 2016. Similarly, not everyone will be able to afford a home automation system but we might end up being one of the biggest markets in the world. Decrease in smartphone prices has led to greater adoption. Similarly, as the cost of the underlying electronic hardware reduces, there will be reduction in price of all home automation systems.

Is it just the beginning of home automation?

Home automation is a technology on which people have been working for many years. The first demonstration of an automated modern home dates back to 1998, and it was named as the Integer Millennium House in Watford, England. The home was refurbished in 2013 to add even more systems. The home has a greywater recycling system, building management system, an intelligent security system and a photo-voltaic array.

Needless to say, the Integer Millennium House is not affordable to anyone other than the super-rich.

Can I afford home automation now?

Many companies are competing today to build home automation systems that will soon be fitted in homes across the world. Also, the cost of electronics that help automate a home are going down very fast. This will help to lower the cost of automating your home. Thousands of enterprises across the world, namely hotels, have begun implementing these systems.

Is the technology sufficiently mature?

Home automation technology has progressed a great deal in recent years.
