

It also has a less expensive younger sibling, the Ecobee 3 Lite, which comes equipped with most of the same features, lacking the ability to connect with the remote sensors. Still it's a good device and is ideal for smaller apartments.

Keen Home Smart Vent

When everything is smart in your house, then why not the vents?

Smart Vents, though a new and expensive piece of technology, aim to make the HVAC system in your house all the more smarter and power effi-

The Smart vent by Keen is compatible with a few smart hubs including SmartThings and Wink

cient. Keen Home launched its \$80 (roughly ₹5,500) smart vents recently. These sleek white vents will match most of the decor in your house, and are compatible with the Nest Learning Thermostat. There's a soon to be released update that will make it compatible with the Ecobee smart thermostat too. The vents can be set up on your own, though might require some effort. These vents detect the temperature of each room in the house and redirect air as per need, giving you room-by room control of the house. **d**
