Olly

Olly is a personal robot with a personality. The robot is designed in the form of an animated eyeball that is placed on a lamp-shaped cup. You will be able to view a large blinking eyeball that rotates on each side when you speak. The functionality of the robot is primarily focused on smart scheduling. Hence, it will help those people who are poor at maintaining their routines.

Josh

Josh is a wireless and voice activated assistant used to control and automate your

Even kids can play without any trouble with the cute Moorebot robot assistant

home. The Josh assistant works on iOS and Android platforms. It works in tandem with all the systems in your home and will also remind you when you forgot something. It will also lock the door when you are away thus providing security. If you say “Hey Josh, I’m home”, it will activate the lights. The possibilities are endless and it’s up to you to work with Josh to explore all the possibilities.
